

Your customers and your employees are important:

CORRECTLY APPLY EPA REGISTERED DISINFECTANTS!

These are very challenging times. Public health and business continuity have come to a critical crossroad that requires our communities, and businesses to act in unison. COVID-19 poses a serious health risk that must be met head on with effective planning to minimize its impact as we work to get back to normal.

ProCleanings Co. has more than **7** years professional cleaning experience. We use the latest technologies to correctly apply EPA registered disinfectants (for SARS-COV-2 / COVID-19) with greater accuracy and speed. These technologies include:

- **Electrostatic Sprayers** – uses molecular ionic tech that enables the disinfect to bond to surfaces
- **Fogging** – great for broader reach and airborne contamination
- **Backpack Sprayers** – fast and effective for large spaces

We are a **CDC** and **OSHA** compliant company that requires employees to be trained, and to wear Personal Protective Equipment (PPE) at each job site:

- Offices
- Bathrooms
- Churches
- Event Spaces
- Movie Theaters
- Reception Areas
- Gyms & Fitness Center
- Daycare & Schools

Our Process

Preventative Application

Schedule regular application of disinfectant in common, high traffic areas to minimize contagion spread.

Reactive Application

If your site has had a contamination, we can quickly respond and allow your business to continue.

Electrostatic Spraying Benefits

- More effective and efficient
- Touch free disinfecting of nonporous surfaces
- Minimizes manual wipe down to porous surfaces (saves money and time)
- Rapid broad area coverage
- No harmful residue

CDC & OSHA Compliance

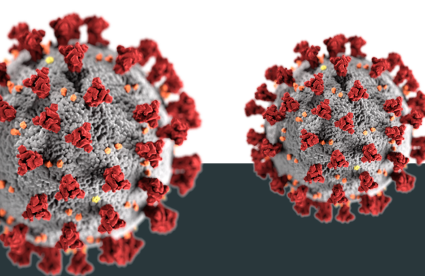

- All employees are required to wear PPE
- Mitigates cross-contamination
- We follow strict social distancing guidelines

EPA Registered Disinfectants

- We use EPA registered **List-N** products when applying disinfectants for COVID-19
- We provide documentation with details about the applied disinfectant and the date of service

Additional Services

- Manual wipe down cleanings are recommended for all high touch areas and porous surfaces
- Janitorial services also available if needed
